VOLUME 20, No. 27 — CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA — FRIDAY, JANUARY 8, 1915

Patronize Home Industry

Start the New Year right, by buying your supplies in Campbell. If we do not have just what you want we can soon get it for you.

We keep always on hand a fresh supply and a good quality of

Teas, Coffees and Canned Goods
Butter, Cheese and Eggs
Toilet and Laundry Soaps, Washing Powder

Anything Needed in the Kitchen

Farmers Union

It is a well known fact that dirt CANNOT be removed from milk by straining as there is a great deal of it immediately goes into solution, but we maintain that it can be Very Effectively Kept Out by proper methods of milking and handling.

We wish to say that we use the utmost care in producing for our customers a pure and sanitary product.

If you feel the need of pure milk of good quality, give us a trial. Milk delivered in BOTTLES morning and evening.

THE MODERN BANK

Without the modern bank there would be no safe depositories for money, no strong vaults and automatic locks, no way to disburse money in payment of accounts except by cash, no chance to mail drafts or checks, no circulating medium, and the efficiency of money would be reduced ninety per cent.

Shut out banks and industries would languish and commerce cease, and farmers would not prosper for lack of funds.

And this would result if everyone was afraid to trust the Banks.

Local and Personal

This is 1915. Write it.

"The Quality Shop" that's us, KING'S.

Sewing done by the day. See MRS. MARY PALMER.

Mrs. Chas. Atkinson and brother made a short call last week at the Manse.

Rev. G. E. Atkinson spent Monday in San Francisco on Efficiency Committee work.

Mrs. Mary E. Giles of Bails Ferry, Cal., visited her sisters, Mesdames R. W. Kennedy and E. Fritz, last week.

The Fire Department has received two modern respirators for use of the chemical nozzle-men in case of inside fires.

The W. C. T. U. will meet with Miss Cauldwell on North Central Avenue, Wednesday afternoon, January 13th, at 2:30 o'clock.

Lost: A small purse along the S. P. track between the station and Sunnyside. Finder please leave at the PRESS office for reward.

Mr. and Mrs. J. L. Hagelin and daughter, Miss Anna, spent New Year's week celebrating in San Francisco. Mr. and Mrs. Hagelin returned Monday, and Miss Hagelin later.

The January meeting of the Home and School Club has been dropped and the same subject will be discussed at the February meeting, "The Need of a New Building, and Bonds."

When a man thinks of his feet he is considering their appearance or their comfort. In either case the Waukerz Shoe is an answer to the thought. THE CAMPBELL SHOE STORE.—Adv.

Mr. and Mrs. C. S. McIntire arrived last week and are with Mrs. McIntre's parents, Mr. and Mrs. W. W. Dunham. They left Mt. Vernon, South Dakota, the day before Christmas, when the thermometer was down to 42° below.

Messrs. Archie Cilker of Los Gatos, C. B. Miracle and Ernest Hoerler returned Saturday from a five day's hunting trip in the San Joaquin. They brot home a big bag of ducks and geese, Mr. Miracle getting one honker, which are rare on this side of the Sierras.

The Country Woman's Club held its annual meeting Monday at which the year's directors were elected—Mesdames Ellen R. Smith, Dora Ross, Lillie Shaw, Orrill Atkinson, and Miss Mary Lewis. The directors chose the following officers: Mrs. Smith, President; Mrs. Ross, Vice-President; Miss Lewis, Secretary; Mrs. Shaw, Treasurer; Mrs. Atkinson, Director At Large.

Water Wasted

Mr. L. H. Albertson, of Santa Clara, who has worked so hard and indefatigably for the developement of the water resources of this valley, reports that he is in receipt of a letter from Senator Newlands, stating that, "I hope to be able to push the Newlands River Regulation Bill to an early success with the co-operation of such associations thruout the country as you are identified with." Also a letter from Congressman Hayes stating, "I have had many a session with Senator Newlands on this bill and I approve the general principals of it."

This bill appropriates $600,000,000 for water conservation for 10 years from its passage. $50,000,000 is the apportionment for California. It provides especially for storing water for the purposes of irrigation and underground water channels. This is the most comprehensive and scientific piece of legislation ever proposed. The bill ought to have the active support of every citizen of the United States.

Other sections are active in the support of this bill and are preparing data on which to base their claim to a portion of this appropriation. Los Ageles County has expended nearly $15,000 for a survey of its watersheds in anticipation of the passage of this bill. The Santa Clara Valley has watersheds possible of developement equal to any of the state. It behooves the people of the valley to promote a movement to have a survey of our watersheds prepared in order that we may be ready to place it before the United States surveyors upon the passage of this bill.

A Close Game

A very interesting game was played on the High School basket ball grounds New Years after noon between the local team and the College Park Academy team, which resulted in a final score of 34-24 in favor of Campbell. At the close of the first half the score stood 14-16, with the balance on the wrong side. The line up of the teams was—

Campbell		C. P. A.
Bryant	Forward	Wright
Righter	"	Ludwig
Faublinger	Center	Ball
Lancaster	Guard	Furnish
Huntley (1st half.	"	Meredith
Bydekarken (2nd "	"	

The Alumni and second H. S. teams also played a close game, the score being 26-27 in favor of the alumni.

Class of 1911 Reunion

Misses Beth Kennedy and Muriel Palmer were hostesses Saturday evening at a reunion of their High School Class, held at Miss Palmer's home.

Some of class of 1911 were unable to be present, but the following responded to the invitation; Misses Helen Marshman, Marion Duncan, Dorothea Smith, Ruth Hoag, Esther Smith, Beth Kennedy, Muriel Palmer, and Messrs. George Beaver, Elton Jones, Clifford Jones and Russell Downing.

Miss Florence and Edgar Kennedy assisted. "500" and Rook were played, which with music, and the exchange of experiences made the hours pass quickly.

The evening was concluded with the serving of generous refreshments.

New Year Party

Among the many festivities which welcomed in the New Year, was a very delightful party at the home of Mr. and Mrs. Thos. Mendel.

The living-room was very pretty with greenery, and the American and British flags occupied positions of prominence.

"500" and Rook were played until refreshments were served, which were especially delightful. Following the sandwiches and coffee, Mrs. Mendel brot in the plum pudding in a "blaze of glory," and later served English plum cake, which had come from Bolton, England, and contained the usual little silver charms and pieces, which the guests were eager to find.

At midnight, Mr. Barron on a crutch, represented the old year hobbling out, followed by the company, who tooted their horns and made night hideous for a few minutes. Then Mrs. Ainsley brot in the New Year, which Annette Merrill impersonated.

A general jollification of music and revelry followed until the guests departed with many "Happy New Years."

Officers Installed

Deputy Grand President, Mrs. Helen Sellers and suite of Los Gatos were present, Tuesday evening and installed the officers of Ada Rebekah lodge as follows: N. G., Mrs. Bessie Merrill; Vice G., Gertrude Carney; Rec. Sec., Mrs. Lillian Dowton; Fin. Sec., Miss Winnie Grizzell; Treas., Lester Merrill; Right Supporter N. G., Mrs. Myrtle Johnson; Left Supporter N. G., Mrs. Neff; Chaplain, Mrs. Hattie Dunham; R. S. V. G., Mrs. Emma Bulmore; L. S. V. G., Mrs. Sadie Thomas; Warden, Mrs. Minnie Densmore; Conductor, June Brown; Inside Guardian, Mrs. Mary Brown; Outside Guardian, W. W. Dunham.

After the installation, supper was served, and then dancing and other amusements followed.

People Safe in Turkey

Mr. G. E. Atkinson has just received word from the American Board Rooms as to the situation in Turkey where his brother is. The news is reassuring so far as personal danger is concerned; but the situation is critical and conditions restless. Dr. Atkinson's hospital has been seized by the Turks for military purposes, leaving however the Doctor as Surgeon-in-charge.

The anti-war feeling is strong in Constantinople, and has led to four resignations in the Cabinet, with others rumored Postal requirements are very hampering to business and all intercourse. All letters must be written in the official language—French—English being absolutely prohibited. Letters may be written in Turkish or German! All letters must be mailed unsealed, and all letters are so received.

Ambassador Morgenthan is the right man in the right place. All Americans, whether missionaries, officials or civilians, have full confidence in him, as indeed is true of the Allies and of the Turks themselves. Recently Mr. Morgenthan said: "I am thankful that I represent a country whose chief interest in Turkey is educational and benevolent rather than political and commercial."

As to the question of a "Holy war," this word is said: "There is no possibility, in the judgment of those who best understand the situation, that, under these circumstances, what is commonly understood as a "holy war" can be fought. Turkey today, under German domination has no real leadership in the Mohammedan world. No call for a holy war issued from Constantinople can have any influence in general over Mohammedans—even in Turkey—much less in Arabia, Egypt, Persia, India and elsewhere. There is no need of undue anxiety of thought on a subject of a Holy War on the part of Turkey at this time."

HELP WANTED

We want about fifty people,—men, women, boys and girls,—each one to buy ten cents worth of dates and thereby help us to dispose of a box of this fruit which came too late for the holiday trade.

Dates are just as good now as at Christmas time, anyway, so while the rainy weather lasts and the going is bad, we offer this suggestion:—

Don't Make Dates—EAT 'EM!

NEWS for the YOUNG PEOPLE

MAKING TOY STEAM ENGINE

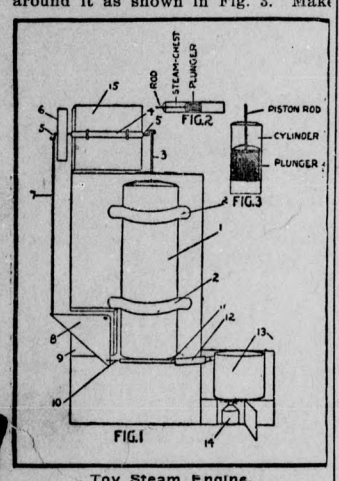
Detailed Instructions, Together With Illustration, for Construction of Interesting Plaything.

A toy steam engine can be put together by following the instructions given by John J. Ruhlmyer, Jr., of Kansas, in Farm News, as follows:

The frame is a solid piece of wood with block (15) to support the crank case (4), and block (9) to support the valve crank (8). The cylinder (1) is made of an old bicycle pump cut in half, with a small hole in the middle and is fastened to the frame by clamps (2).

Next take the piston of the pump or some small tube (11) and punch a hole on one side the same size as in the cylinder, then solder them together. Next make the piston of the cylinder by taking a light piece of rod, having it long enough so that it will reach from the shaft (5) to the bottom of the cylinder.

Cut some threads on the piston (3) and then take a spool and wrap a string that is well saturated with oil around it as shown in Fig. 3. Make



Toy Steam Engine.

the plunger so that it will fit tightly and yet move up and down freely. Next get a long piece of iron and make the crank shaft (5), then insert it in a small pipe of nearly the same size (4) and fasten it by clamps. Bend the shaft to the right in the shape of a crank and attach the piston rod (3) to it.

On the other end fasten the fly wheel, which may be a pulley or sewing machine wheel. After the flywheel (6) has been attached bend the end of the shaft projecting to the shape of a crank. Have the two cranks at right angles. On this crank the rod (7) is attached which runs to the valve crank (8), which is made of a piece of sheet iron cut in a triangular shape and attached to block No. 9.

From the valve crank (8) a bicycle spoke (10) is inserted in it. Cut the nut half in two, then wrap some string which has been well saturated in oil around it, and this will serve as a plunger for the steam chest (11), Fig 2. Next make the boiler, which may be a sirup bucket or something similar and solder a pipe to it.

Connect the boiler and the steam chest by means of a rubber tube. The water in the boiler is heated by a lamp or something similar. This is how the engine is run. Turn the flywheel (6) enough so that it will force the valve crank back, causing the valve (2) to open, and the steam will rush in the cylinder, causing the piston to raise which will turn the flywheel, which in turn will push the valve crank back and shut the valve off. The pressure of the steam will also help to open the valve.

TAKE GOOD CARE OF VIOLIN

Instrument Should Be Placed In Wooden Case, Lined With Cloth, and Carefully Kept Dry.

Boys who possess violins will find the following tips very useful.

It should be kept in a wooden case lined with cloth.

Carefully keep it from the damp.

Do not keep it in a hot place, or the wood will become brittle and the strings dry.

Always place it in its case when carrying it from one place to another.

Keep it in its case in summer when not in use, as dust accumulates inside and out.

Keep it perfectly clean. Carefully wipe dust or resin dust off with a soft linen cloth.

To clean it inside, take a good handful of barley, heat it, and put it inside the violin. Shake about well, when the dust will adhere to the barley and can be shaken out.

Silence Is Golden.

Papa—Now, Johnny, I have whipped you only for your own good. I believe I have only done my duty. Tell me truly, what do you think yourself?

Johnny—If I should tell you what I think you'd give me another whipping.

WAR'S HORRIBLE SIDE

WHEN IT IS BROUGHT HOME TO AVERAGE CITIZEN.

Never Anything But a Frightful Nightmare to the Man Who Has Relatives or Friends in the Line of Battle.

You live on a certain street, in a certain place, and war comes. Your neighbor's son John enlists; and so do your own son and the son of the man two houses beyond yours. They go to war. Presently they bring back your son with a leg gone or an arm. Presently a brief "Your son has fallen!" comes from the war office to your neighbor. Presently in your newspaper there stares from a long list of dead or wounded the name of the pride of the house two doors beyond. You get that. It is real, vital, personal.

Or these boys march up the street carrying guns, arrayed for war. Some of the enemy appear from around a corner. Firing begins. There is fierce fighting. When it is over these boys of yours are lying in the road or in the adjoining field, some dead, some wounded—and you know what that means.

From hundreds of other streets like yours hundreds of sons of other mothers march away. They go to battle. You read uncomprehendingly in the official dispatches that the center advanced or the left wing was repulsed. You read that there was a sharp engagement at some place, a daring assault at another; that the troops are intrenched; that the great flanking movement has succeeded or has failed. You read these things, and then what? Nothing. It means little.

The battle line is 200 miles long; but on every foot of it there is the son John of somebody's neighbor, the husband of the woman up some street, the child of some mother—millions of them; and they are being wounded and killed because it is their part to be wounded and killed in order that a certain contention may prevail over a certain other contention—both of which will seem absurd in a few years—or that a certain ambition may surmount a certain other ambition, neither of which ambitions will be reckoned, in the long run, as worthy of civilized consideration. We have reverted to the primitive. The humane in us has been subjugated by the necessities of the state.—Samuel G. Blythe, in the Saturday Evening Post.

Skipper's New Title.

As a rule skippers, outside the three-mile limit, manage to show in some way or other that they are sovereigns of the deep, carrying out the ancient saying that a captain is the "king of his ship." There was one exclusive captain sailing out of San Francisco who not only had his own steamer chair, but made known the fact that it was his chair and his alone by having painted across the back the words "Captain only."

The day after the vessel sailed on a particular voyage one of the passengers happened to seat himself in the skipper's deck chair and was immediately told by a steward that the chair was for the comfort of none but the captain. The passenger arose, and having circled the deck several times, saw the skipper reclining in the chair.

He strolled leisurely over.

"Good morning, Captain Only," he said, with a mock salute, and passed on.

Early Views of Suez.

The government's notification that enemy ships are not to be allowed to shelter in the Suez canal reminds us of the strange views as to the military future of the canal entertained by those who opposed its construction. Lord Palmerston insisted that its obvious purpose was "the barring of the passage along the coast of the Mediterranean to any Turkish army which might be employed to restore the empire of the sultan, by opening a great military canal 300 feet broad and 30 feet deep, laid with batteries." As a commercial enterprise, he pronounced the scheme "a mere bubble." But in this prophecy he was not singular. The Times in 1859 wrote of "the suspicious project of the impracticable Suez canal," and Disraeli, who was afterwards to buy the canal shares, called it "a most futile idea, totally impossible to be carried out."—London Daily Chronicle.

Brocken Specter.

An interesting example of the Brocken Specter was recently described by Sir Thomas Holdich at a meeting of the Royal Geographical society. It appears that there is a mountain called Omi on the borders of China and Tibet, where it was claimed that the devout worshiper might occasionally see, from the summit, the image of his great teacher Buddha approaching the mountain. This belief was recorded as a mere idle superstition by explorers, until one of the latter happened to ascend the mountain under suitable atmospheric conditions and saw his own, apparently colossal, shadow cast by the sun upon a bank of fog; in short, the well-known Specter of the Brocken.—Scientific American.

Accomplished Girl.

"How is Graziella getting along with her language lessons?"

"Splendidly. She can now address her poodle in French, German and English."

ALASKA A Land for Women

NEW YORK has too much civilization, too many chaperons and not enough romance. The first loads us with useless customs and ineffectual laws. The second robs us of "palship" between the sexes. The third causes a feverish rushing about after any and every diversion which momentarily feeds the soul and senses. But Yukon way, it's different. People live only in the things that count—courage, work, love, human sympathy. And there is lots of it going begging, especially love.

So declares Mrs. Robert H. Pierson, wife of a captain in the medical corps of the United States army, who has lately returned from Alaska to eastern civilzation. She spent two years at Fort Gibbon, a post so near the arctic circle that you have to wear a bit of rabbit skin on your nose to keep it from freezing. And when you put a pan of boiling water on the floor for the puppy dog to drink, it is solid ice before he has taken three laps of it.

"It sounds frightsome," laughed Mrs. Pierson, "but Alaska has so much to recommend it that a trifle like 60 degrees below zero can be forgiven.

"In the two years I was there I met more real people and learned more of the big, fundamental things that make life worth living than in all the rest of my existence put together.

Opportunity and Romance.

"Alaska is a land of opportunity—especially for women. A woman can go anywhere alone, whether through the wilderness driving her dog sledge or in the sturdy young cities like Fairbanks and Nome.

"Women and men pal together out in the big northwest. They are friends, not commercial rivals or sex antagonists, as so often happens in eastern civilization. Chaperons are unknown and unneeded. I have never seen disrespect shown to a good woman, and rarely to an unworthy one.

"As for romance!" Mrs. Pierson closed both eyes and raised her hands toward the ceiling in an expressive gesture of superlativeness.

"One cannot keep a housemaid. She remains a housemaid only long enough to be spied by some lonely claimstaker. After that, as the claimstaker's wife, she becomes an employer of housemaids, who in turn become mine owner's wives, who in turn employ more housemaids, who in turn marry more mine owners—and so on and so on and so on!

"I used to invite school chums to visit me, and before I had a chance to show them around they informed me they had met their ideal man and were going to be married right off.

"I never saw such an active matrimonial market. And I cannot say too positively that the Alaskan men are the most worth while of any in the world. They have to be fine men physically and morally to overcome the hardships of Alaska's wilds."

Hard But Gallant Trail.

To prove her confidence in Alaskan men and Alaska ideals, Mrs. Pierson and the wife of a comrade army officer made a seventeen day trip from Fort Gibbon through trails by dog sledge to Fairbanks and Chenoa Hot Springs, where in the midst of glacial coldness gush streams of boiling curative waters.

There were five dogs to each outfit, part St. Bernard, part "malmute," part mastiff and part plain wolf, within whose reach it is none too safe to stub your toe. The sight of a person or animal lying prone acts upon these wolf dogs, puts a keen and sudden edge upon their appetites and makes them forget they are decorous doggies whose profession is sledge hauling.

Each of the traveler women had a soldier from Fort Gibbon to "mush" for her, driving the team by "gee" and "haw" and riding on the runners when convenient down grades appeared. "Mush" corrupted from the French "marche" is a great word in Alaska. Everybody "mushes," which means "to walk," "to tramp," "to hike."

"A fair day's mush," says Mrs. Pierson, who looks, from her patent leather pumps to her made-in-Paris hat, as if she never had traveled in anything less luxurious than a limousine, "is 30 miles, though swift teams do 60.

Crude But Real Hospitality.

"We put up at night at the roadhouses, which dot the trail 15 miles apart. Alaska roadhouses have to be seen to be appreciated. They are cabins with two or three rooms. They are always run by men, and you can imagine arrangements are simple, to say the least.

"There is usually a living room, a room reserved for women travelers and a bunk room for the men. If the women's room is filled by first comers, those who arrive later take places in the common bunk room, hanging a blanket on a string as a portiere. This was our lot.

"No one apologizes, asks questions, complains or explains. Life is taken for granted in Alaska. And, I repeat, woman can travel thus alone and under the crudest conditions with perfect safety, receiving courteous treatment and protection from every one. Would that be possible in the east?

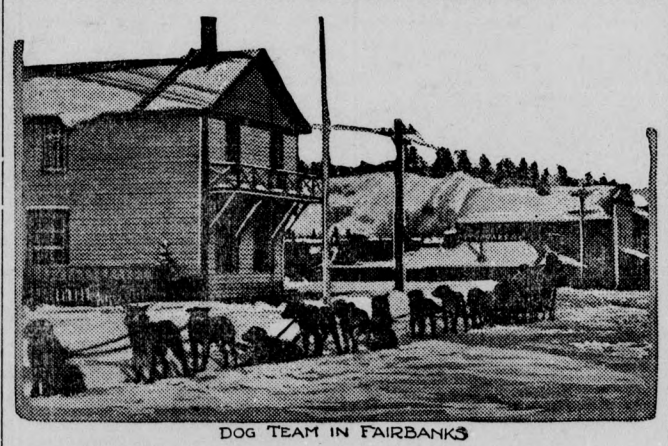
Equality for Women.

"I have known sturdy women to mush many days through the wildest trails, driving their own teams, carrying freight, staking claims, trading and trafficking just as men do, in perfect safety and confidence.

"One of these women now runs the biggest boarding house in Fairbanks and is making a golden livelihood. Money is plentiful out in Alaska. One sees nothing smaller than a quarter.

"You pay a quarter for a spool of thread; two spools if you want them; they cost the same. Rent, clothing and food cost fabulously. But earnings are correspondingly big.

"One thing is cheap—game. Moose, caribou and deer are there for the taking. Grouse can be shot almost in your backyard and are as cheap as chuck steak in New York."



DOG TEAM IN FAIRBANKS

His Lame Excuse.

Poor little Mrs. Marrow was not at all pleased with the tradesmen of the health-giving, picturesque, and charming—see advertisement—seaside resort at which she and her brood were spending the summer holiday.

But the grocer! Well, in Papa Marrow's language, he was the absolute "it" in limits.

One morning, after waiting nearly 40 minutes to be served with a packet of currants, the poor little lady ventured to protest to the perspiring proprietor, who was struggling with about fifteen customers at once.

"Can't you serve me now?" she asked.

"One moment, ma'am! Won't keep you a second, ma'am," replied the grocer, mopping his brow with a currant loaf. "The truth is I'm rather handicapped this morning. My right hand is at home with a sprained ankle, unfortunately—just at the busy time, too!"

New Torpedo Explosive.

A new submarine mine explosive called "trotol," which cannot be set off by percussion, but which has to be confined and fired by electricity, was employed in the recent annual war test of submarine mines off Sandy Hook. Trotol, it is declared, can be melted and handled without any danger. Mines loaded with 100 pounds of the new explosive and fired during the recent test threw columns of water and pieces of targets two hundred and fifty to three hundred and fifty feet in the air. Each mine was allowed to remain in the water two hours before being exploded in order to test the water-tight joints in the cable containing the firing circuit.—Electrical World.

SHED THE BEST WASHROOM

Its Advantages Are Many, Where Such an Apartment Is at the Command of Housewife.

In case a woodshed is available, with an old stove that can be used there, these should be pressed into service for washing during the winter months. The woodshed as a washroom would necessitate a washday which is mild and sunshiny, but there is usually more than one such day in each week; and when the health of the family is at stake, the washing can well be done on some other day than Monday. At best, the woodshed would be cold, hence the worker would need a piece of old carpet or linoleum and warm bricks or a soapstone to protect her feet while standing at the tubs.

A small bench on rollers, made the same height as the wash bench, will enable the housewife to move the filled tubs about without any lifting. Such preparations on the day previous are necessary in order to shorten the processes on washday and hasten the drying of clothes, for the earlier in the day that some of the clothes can be put on the line, the less need there will be for the remainder to lie wet in the house or to be dried there.

In case a shed is too cold for use in all processes of washing, it should be used for those which send off much steam, such as running clothes through the washing machine. Wringer, wash bench, boiler, basket and hamper should be kept in this shed rather than carried from the cellar and back, or rather than keep doors open while carrying them from the smokehouse to washroom, as is sometimes done.

USING THE SEWING MACHINE

One Who Does Much Sewing Should See That It Is Always in Perfect Condition.

When much machine work has be done, filling the shuttle is a constant annoyance. This can be partly obviated by threading the shuttle with finer cotton than that used on the needle. The sewing will be quite as strong, and the shuttle will not need refilling half so often as it would if threaded with the same number of cotton as the needle, because the spool will hold a great deal more of the finer cotton.

If you want your sewing machine to do satisfactory work, remember that it needs to be kept clean. After every ten hours' work it needs oil, but all surplus oil must be carefully wiped off afterwards. Always work it steadily, and never start or stop with a jerk.

One dressmaker, whose machines are noted amongst her sewing girls for their smooth and easy running, oils them once in every three times with paraffin instead of the usual oil. Of course she is careful that the machines are kept scrupulously clean. A dirty machine can't be expected to do good work.

When your machine is not in use, see that the wheels are left so that the oil holes are at the top of the hub. This will save clearing away the superfluous oil, which trickles out and causes the hub to catch the dust.

Before you begin to sew take an odd piece of material and stitch backwards and forwards before commencing ordinary work. If any oil works up with the needle, as so frequently happens after oiling or cleaning, it will not spoil your material.

Treat a machine as a delicate instrument, and keep it away from draughts and damp.

To Cook Cabbage in Half an Hour.

Have plenty of salted boiling water, in which a teaspoonful of soda has been dissolved. Plunge the cabbage in, top downward; leave it uncovered and let it boil until tender. That will be from twenty minutes to half an hour. Take it out into a colander; drain well, put into a hot dish; add lots of butter, some salt and pepper and serve at once. It will be as delicate as cauliflower and the color be retained, as well as no unpleasant odor over the house such as is always associated with boiling cabbage. Try it once.

Underdone Meat.

If a joint of meat should be too underdone to eat, and several slices have been carved out, it can be cooked again and served up as a fresh joint if the hole is filled up with mashed potatoes and cooked in a brisk oven for an hour. The browned potatoes will be much appreciated and the fact that it is the second time of sending it to table will not be noticed.

Browned Flour for Gravy.

Keep a quantity of browned flour on hand for making gravy; you will find it saves a great deal of time. Put several spoonfuls evenly on the bottom of a baking pan and stir it over a moderate fire until it becomes an amber brown. Turn it into a bottle and keep for use.

Bran Gems.

One egg, one cupful flour, two cupfuls bran, one teaspoonful salt, three tablespoonfuls molasses, one tablespoonful shortening, one teaspoonful soda, buttermilk to make a stiff batter, raisins may be added if desired. Bake 25 minutes.

To Make Succotash in Winter.

Take small white beans, soak them 12 hours and then put them on to boil. When half done, add the corn and let them boil until soft, when add butter, salt and pepper.

Fundamental Principles of Health

By ALBERT S. GRAY, M. D.

(Copyright, 1914, by A. S. Gray)

PURIN FOOD MATTER.

Emil Fischer first called attention to a nucleus composed of carbon, hydrogen and nitrogen, which he called "Purin," and which is found to be widely distributed among food matters. The purin bodies are regarded as the parent substance of compounds of the uric acid and xanthin group, which are progressively oxidized purin nuclei, running about as follows: Purin; adenin, or amino-purin; guanin, or amino-oxy-purin; hypoxanthin, or oxy-purin; xanthin, or dioxy-purin; uric acid, or trioxy-purin, uric acid being the most highly oxidized purin of the group.

About twelve different combinations of the purin nucleus are known to exist in nature, but not fewer than 146 have been produced in the laboratory. How many may be formed in the body in the cycle between the protein intake and the nitrogenous excreta and their final effect on human health and happiness is not known, but certainly they exert a profound influence on us.

Purin bodies are stimulants and they exist in all meat extracts, in the flesh meats of ordinary consumption and in much larger quantities in the glandular organs. In lesser amounts they occur in many vegetables and grains, as in oats, the potato and the sugar beet. Caffein, the active principle of coffee and tea, and theobromin, the active principle of cocoa, are respectively trimethyl and dimethyl compounds of xanthin.

Hall names a number of common foods containing purin bodies, and the following list gives the amount contained per pound:

FISH.

	Grains per pound.		Grains per pound.
Halibut	7.14	Salmon	8.15

MEAT.

Mutton	6.75	Beefsteak	14.51
Veal	8.13	Beef liver	19.26
Loin pork	8.48	Sweetbreads	70.43
Ham	8.08	Chicken	9.06
Beef ribs	7.98	Turkey	8.82
Beef sirloin	9.13		

VEGETABLE MATTER.

	Grains per cup.		Grains per cup.
Oatmeal	3.45	Tea	1.20
Beans	4.16	Coffee	1.70
Peas	2.25	Potatoes	0.14

Milk, butter and cheese are not found to contain any free purin or purin yielding substances. Lehman found one gram (15.43 grains) of uric acid excreted in 24 hours on a purely vegetable diet; 1.1 grams (16.94 grains) on a mixed diet, and 1.4 grams (21.56 grains) on a diet consisting chiefly of meat. Haugton found three times as much uric acid excreted by meat eaters as by vegetable eaters.

Dapper, Ranke, Bunge, Marez, Schultz, Taylor, Burian and Schur and many others find that a higher excretion of uric acid is brought about by a meat diet than by vegetables, fats and carbohydrates. Dietetics is gradually becoming an exact science and certain general principles are recognized by science about as universally as they are disregarded by the average individual.

One definitely fixed fact is that the physiological fuel values of our foods are as follows:

Carbohydrates, 4 calories per gram (15.43 grain.)
Fat, 9 calories per gram (15.43 grain).
Protein, 4 calories per gram (15.43 grain).

Proteins are exactly interchangeable with carbohydrates as a fuel food, but carbohydrates are not interchangeable with proteins. Proteins are, as we have seen, growth and tissue repair foods, for which there is but a limited demand, and any material excess, especially in the purin nucleus containing proteins, tends to derange our metabolizing functions, to form body poisons and thereby break down our excreting organs. Hence Bright's disease and similar degenerative diseases.

Carbohydrates and fats, on the other hand, furnish straight fuel or energy producing foods, which, in their natural state, are burned in the body with a minimum residue and without creating deleterious by-products. Because of its stimulating qualities, protein is not only an uncomfortable and dangerous hot-weather fuel food, but it is very expensive. Three thousand calories of lean steak at 20 cents a pound cost $1.26; the same amount of energy in oysters at 30 cents a quart will cost $1.90; but the same 3,000 calories in genuine wholewheat flour at 6 cents a pound will cost 10 cents, and the same energy in milk at 8 cents a quart will cost but 37 cents.

To be healthy and efficient about three-tenths of our energy should be secured from butter, cream, milk, fats and oils; six-tenths from potatoes, bread, cereals, fruits and vegetables, and one-tenth from protein foods—beef, chicken, fish and the like.

Neither muscular growth nor muscular endurance can be increased by meat eating or by forced protein feeding.

A Real Foe

To Health is a Weak Stomach

From this source arises such ills as Poor Appetite, Nausea, Heartburn, Indigestion, Dyspepsia, Biliousness and Constipation. You can conquer and fortify the system against such foes by the timely use of

HOSTETTER'S Stomach Bitters

Be Sure you get the Genuine.

CLASSIFIED ADVERTISEMENTS

BANK DIVIDEND NOTICES

HUMBOLDT SAVINGS BANK, 783 Market St., near Fourth.—For the half year ending December 31, 1914, a dividend has been declared at the rate of four (4) per cent per annum on all savings deposits, payable on and after Saturday, January 2, 1915. Dividends not called for are added to and bear the same rate of interest as the principal from January 1, 1915.

Farm Notes.

Wandering Jew, climbing nasturtiums, German ivy, ground pine and several other plants, will grow very satisfactorily if the branches are cut and placed in water. They make novel show plants for the winter window garden.

Among the best known of Luther Burbank's productions are the gold and Wickson apple, the double daisy, a blue and crimson variety of poppy, the Australian star flower and several varieties of roses and lilies.

Great producing ability comes from the modified form best suited to do the work.

GIVE "SYRUP OF FIGS" TO CONSTIPATED CHILD

Delicious "Fruit Laxative" Can't Harm Tender Little Stomach, Liver and Bowels.

Look at the tongue, mother! If coated, your little one's stomach, liver and bowels need cleansing at once. When peevish, cross, listless, doesn't sleep, eat or act naturally, or is feverish, stomach sour, breath bad, has sore throat, diarrhoea, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of its little bowels without griping, and you have a well, playful child again. Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which contains full directions for babies, children of all ages and for grown-ups.

Half the Pleasure.

Mrs. Exe—But don't you and your husband take your vacation together?

Mrs. Wye—Oh, dear, no. If we did we wouldn't have to tell each other when to get home."

Good Reasons.

"Why did you throw up that job I got you as collector for Jones?"

"Why, hang it, I owed money to about all the [illegible] to dun."

Quick Relief When Utterly Worn Out

Getting the Blood in Order Is Required By Most People.

If you think you have gone to smash and fit only for the discard, try S. S. S. for the blood. It will surprise you to know what can be done for health once the blood is released of the excess of body wastes that keep it from exercising its full measure of bodily repair.

If you feel played out, go to any druggist and ask for a bottle of S. S. S. Here is a remedy that gets at work in a twinkling; it just naturally rushes right into your blood, scatters germs right and left, up and down and sideways.

You feel better at once, not from a stimulant, not from the action of drugs, but from the rational effect of a natural medicine.

The ingredients in S. S. S. serve the active purpose of so stimulating the cellular tissues of the body that they pick out from the blood their own essential nutriment and thus repair work begins at once. The relief is general all over the system.

Do not neglect to get a bottle of S. S. S. today. It will make you feel better in just a few minutes. It is prepared only in the laboratory of The Swift Specific Co., 536 Swift Bldg., Atlanta, Ga. Send for their free book telling of the many strange conditions that afflict the human family by reason of impoverished blood.

A SPELLING SCHOOL

It Wasn't a Large Affair, But Brought Matters to a Head.

By LAWRENCE ALFRED CLAY.

(Copyright, 1914, by the McClure, Newspaper Syndicate.)

The village of Freedom had no railroad connection, but had you entered it on foot or by vehicle the first resident you encountered would have been Deacon Salathiel Green, putting a leather hinge on his front gate or seated with folded arms on the steps of the post office.

Had you asked the deacon for a list of excuses as to why the village existed he would have answered:

"Well, we have Miss Bird Davis, who is handsomer than an acre of red, white and blue hollyhocks, and smarter'n chain-lightning.

"Also a three-legged calf, owned by Keziah Perkins.

"Also, the loyalty of the people. We have seven hundred inhabitants, but claim twice that number.

"Also, a church spire that has been struck five different times by lightning.

"Also, Grandma Hazleton, who remembers that she dandled George Washington on her knee when he was a kid six months old.

"Also, half a dozen young fellers who are in love with the chain-lightning gal."

This was the tale told to young Roy Campbell as he arrived in the village to spend a vacation of a month in the late fall. He was slightly interested in the three-legged calf, and he reasoned that in time he should behold Miss Davis, but he was not startled. As he bent his steps toward the inn, Deacon Green looked after him and shook his head.

"He may be a nice young man, and he may be a post office robber instead. Time will tell."

The village of Freedom had gathered the vegetables from its gardens, and had plenty of time in which to size up the stranger. It came to the conclusion that he was not dangerous, but why didn't he come out as frankly as the wire-fence man, the windmill man and others had done and relate his history from childhood up? It counted for nothing that he attended church the first Sunday of his arrival and made a generous contribution as the plate was thrust under his nose. Indeed, as Mr. Sparrow said, and as others agreed with him: "If he hadn't been in jail somewhere for something or other would he be seen inside a church and trying to deceive us?"

"No! No!"

"He gave up half a dollar to the plate, while the rest of us gave pennies and nickels, but wouldn't Captain Kidd have done the same?"

The young men realized at once what had brought the stranger to the gates of the village. He had heard of the winsome Miss Davis, and had come to admire, fall in love and wed her and bear her away. He was from the city, and she had been heard to say that she should never live in a village after marriage. Therefore, they glared at him and avoided him and talked to his detriment and wished him to Halifax.

A woman can overlook it in a man for being a bit wicked, if it is not her husband. A girl can and does overlook it if the man is young and good-looking and a mystery is thrown around him. It was logical that when the young men dropped their differences and combined against the stranger they excited curiosity more than distrust among the female hearts not too old.

Miss Bird Davis encountered Mr. Roy Campbell at church and on the street and said to herself: "He may be a criminal and a fugitive from justice, but I'd like an introduction to him just the same."

They told her that he was probably a horse thief. That he was a scout for post office robbers. That the constable had an eye on him. That the sheriff was seeking to get his finger-prints. That while he looked as innocent as a yearling babe, he would try every art to get a girl to elope with him, and after a month leave her dead broke on the street of some cold and cruel city.

Miss Bird listened. She also laughed. She likewise suggested that an introduction to such an interesting character was in order.

What brought matters to a head was a spelling school. Freedom was proud of her school. It wasn't a great big schoolhouse, with a large and liberal staff of teachers. On the contrary, no unnecessary building material had been used, and two teachers did all the whaling and teaching. Neither French nor German was taught there, but when it came down to old-fashioned orthography the rest of Warren county had to go way back and sit down. Whenever in a newspaper or magazine one of the pupils discovered the word "program" with the final "me" added, an indignant protest was at once forwarded to the guilty party.

Beginning with the fall term, these spelling schools were held once a month all winter. One was due a few days after Mr. Campbell appeared in Freedom. It was talked of as being better than a moving picture show or a circus. People who wouldn't go to a funeral had the front seats at these contests.

No one invited or suggested, but when the evening came Mr. Campbell was there. Moreover, he was chosen by one of the sides, and it was thus that he found himself a contestant, instead of a spectator. It was Miss Bird who had the choice of the opposing line, and she had her love-sick swains beside her. All were good spellers, but she was always the last of the two lines to go down. Her mother had said of her:

"Nobody can say whom Bird will fall in love with and marry, but you can make up your mind it'll have to be somebody who can spell her down."

By and by the hard words came, and the lines began to thin and shorten up. Until he caught Miss Bird looking at him defiantly, Mr. Campbell had wished he had kept out of it. There was a direct challenge in her eyes and pose that awoke a feeling of antagonism and he determined that the victory should be his.

In time they were the last two up. Of course the hopes and sympathies of the people were with the girl. Even in her alertness she caught whispered words behind her which she was to recall later on. For a long ten minutes it was nip and tuck, as Deacon Green expressed it, and the young man had won the victory. There were no signs of dejection on her part, but the victor held out his hand with a smile and said:

"You did nobly. Let me say to you that I am one of a firm publishing a dictionary, and no word goes into it until I have spelled it."

"I am glad that I had such a worthy antagonist," she pleasantly replied.

The next morning there was great excitement in Freedom. Mr. Campbell was missing. He had not returned to the inn after the spelling school. He had not left town in any vehicle. He had not taken any of his effects with him. Would he take the highway thus on foot? He had been seen leaving the schoolhouse, but after that all traces were lost.

The constable got busy, and with him a score of people. It could not be that any accident had happened, and telephone messages to the nearest villages failed to ascertain that the missing man had arrived there or been seen upon the highways.

All day the hunt and the talk went on and it was far into evening that Miss Bird remembered the whispered words behind her: "If he spells her down it must come tonight. Is everything ready?"

Roy Campbell had mysteriously disappeared. Her would-be lovers must have had a hand in it, for they were all sitting together. There was no lake or river into which they might plunge him. If they had menaced him into leaving the village, he would not leave without calling at the hotel. What then? It must be a case of kidnaping, though that seemed too bold an offense for the young men to commit.

If it was a case of kidnaping, where was the victim being held?

Mr. Davis was a quiet, even-tempered man. Not once a year did he get angry at anything, and he had never been known to strike a man a blow. It was to be expected, therefore, that he would be bewildered when the daughter came to his bedside at midnight and awoke him.

"Father, you are to get up and come with me!"

"Where? What?"

"I think I know where Mr. Campbell is."

"Good Lord!"

Ten minutes later, when he had joined her downstairs, she said: "I believe the young men have kidnaped Mr. Campbell and are holding him in the old cider mill. We are going to see."

"I will get the constable," he replied.

"We do not want him with us. We are going to manage without him. If we find Mr. Campbell in there alone he will be bound, and we can release him. If the young men are there you are to sail in and knock their heads off!"

"But I'm no fighter," he protested.

"But you've got to be or I'll deny you as a father!"

The young men had made prisoner of Roy Campbell and borne him off to the old cider mill, thinking to drive him away from the village by threats. When he defied them—when he was missed and a search began, they knew not what to do except to bind and guard him until some plan was formulated. They were all there, seeking to bribe and renewing their threats.

"Hit every one of them, and hit hard!" the girl whispered in her father's ear as they listened at the dilapidated old door.

Mr. Davis spat on his hands, kicked the door down and "sailed in." And none escaped him. The town of Freedom has never learned the full particulars of that adventure, and never will. It has to be content with the marriage that took place a year later.

All He Wanted.

Carefully Abelard Wilks scanned the fair countryside for a suitable spot. After much thought, he stuck his easel up, got out his paints and started. Oblivious to his surroundings, he was suddenly startled to see a red-faced, perspiring motorist at his side. "Don't put another stroke to it," urged the newcomer. "I'll give you $5 for it as it stands." Something in Abelard Wilks snapped. "It—it is very kind of you," he stammered, "but it's not quite finished." "Don't matter one jot," said he of the motor garb, as he got his money out. "I only want the canvas to mend a burst tire."

On the Face of It.

"My dachschund here is a pedigreed beast."

"How can you say that when anybody can see for himself the dog is a low down pup?"

Famous Salt Mines.

The great rock salt mines of Hungary are among the wonders of the world, for the illimitable deposit of practically pure salt enables the workmen to cut it out in heavy blocks, much as marble is quarried, after which it is loaded on trucks and sent to the mills for grinding. Rock salt, it may be said, constitutes the world's principal supply of refined salt, and the Hungarian mines furnish a large portion of this commercial necessity. Underground passages of considerable width, resembling streets, have been cut at regular intervals, and the whole is well lighted In one of the mines near the Roumanian boundary a large chamber, with benches and seats, has been cut, where occasional gatherings are held, and perhaps in honor of this fact it is known as the "ballroom." Here the colorings are beautiful, the walls of the cavern or hall partaking of the many shades of rare marble and color-grained onyx.

10 CENT "CASCARETS" IF BILIOUS OR COSTIVE

For Sick Headache, Sour Stomach, Sluggist Liver and Bowels—They Work While You Sleep.

Furred Tongue, Bad Taste, Indigestion, Sallow Skin and Miserable Headaches come from a torpid liver and clogged bowels, which cause your stomach to become filled with undigested food, which sours and ferments like garbage in a swill barrel. That's the first step to untold misery—indigestion, foul gases, bad breath, yellow skin, mental fears, everything that is horrible and nauseating. A Cascaret tonight will give your constipated bowels a thorough cleansing and straighten you out by morning. They work while you sleep—a 10-cent box from your druggist will keep you feeling good for months.

Origin of Onyx.

When waters charged with carbonate of calcium derived from limestone are allowed to evaporate they deposit their load in the form of sinter, or tufa. This process can be observed at many thermal and "petrifying" springs and also in the formation of stalactites and stalagmites in limestone caverns. In this way large masses of compact carbonate are formed, some of them of great beauty. The so-called "onyx marbles," of which the Mexican "onyx" is a familiar example, are formed in this way. Some rock of this class is stalagmatic, in caverns, and some of it is formed by springs. Its variations in color and texture, to which its ornamental character is largely due, are commonly produced by impurities or inclusions, such as oxide of iron, or even mud and clay.—United States Geological Survey.

HOW TO HEAL SKIN AND SCALP TROUBLES

A Baltimore doctor suggests this simple, but reliable and inexpensive, home treatment for people suffering with eczema, ringworm, rashes, and similar itching skin troubles.

At any reliable druggist's get a jar of Resinol Ointment and a cake of Resinol Soap. With the Resinol Soap and warm water bathe the affected parts thoroughly, until they are free from crusts and the skin is softened. Dry very gently, spread on a thin layer of the Resinol Ointment, and cover with a light bandage. This should be done twice a day. Usually the distressing itching and burning stops with the first treatment, and the skin soon becomes clear and healthy again.—Adv.

True Enough.

He had received a dollar in change, and was examining it closely. Finally he turned to his companion and said:

"Here's a dollar back that I marked and put into circulation only day before yesterday. Surprising, eh?"

"Oh, I don't know. A dollar doesn't go very far these days," replied the other.—Judge.

NEW MODERN DANCING.

E. Fletcher Hallamore, the leading Dancing Expert and Instructor in New York City, writes: "I have used ALLEN'S FOOT-EASE, the antiseptic powder to be shaken into the shoes, for ten years, and recommend it to all my pupils." It cures and prevents sore feet. Sold by all Drug and Department Stores, 25c. Sample FREE. Address, Allen S. Olmsted, Le Roy, N. Y.—Adv.

Didn't Mean It That Way.

"I'm sorry I can't go to the theater with you tonight," said Miss Peach. "I'm already engaged for the evening. But as long as you have the tickets I'll introduce you to a pretty girl and you can take her."

"But I don't want to go with a pretty girl," sorowfully protested Mr. Lamb. "I want to go with you."—Cincinnati Enquirer.

Dr. Pierce's Pleasant Pellets first put up 40 years ago. They regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules.—Adv.

Suppressed Indignation.

"What do you think of that tenderfoot's having the nerve to spring a deck of marked cards on me?" exclaimed Broncho Bob.

"Did you shoot him?"

"What's the use of killing the goose that lays the golden egg? I held a gun in front of him and made him show me how he marked 'em."

Case of Thrift.

"A reception today, my dear, when you gave a party only last night?"

"Yes; I had a bowl of fruit punch left over, and I didn't see any use of wasting it."—Kansas City Journal.

Weak Heart

Many people suffer from weak hearts. They may experience shortness of breath on exertion, pain over the heart, or dizzy feelings, oppressed breathing after meals or their eyes become blurred, the heart is not sufficiently strong to pump blood to the extremities, and they have cold hands and feet, or poor appetite because of weakened blood supply to the stomach. A heart tonic and alterative should be taken which has no bad after-effect. Such is

Dr. Pierce's Golden Medical Discovery

which contains no dangerous narcotics or alcohol.

It helps the human system in the constant manufacture of rich, red blood. It helps the stomach to assimilate or take up the proper elements from the food, thereby helping digestion and curing dyspepsia, heart-burn and many uncomfortable symptoms, stops excessive tissue waste in convalescence from fevers; for the run-down, anæmic, thin-blooded people, the "Discovery" is refreshing and vitalizing.

In liquid or tablet form at most drug stores or send 50 one-cent stamps for trial box to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y.

Read Chapter VII on Circulatory Organs in the "Medical Adviser"—A French cloth-bound book of 1008 pages sent on receipt of 31 one-cent stamps, address as above.

Shipping Fever

Influenza, Pinkeye, Epizootic, Distemper and all nose and throat diseases cured, and all others, no matter how "exposed," kept from having any of these diseases with SPOHN'S LIQUID DISTEMPER CURE. Three to six doses often cure a case. One 50-cent bottle guaranteed to do so. Best thing for brood mares; acts on the blood. 50 cents a bottle, $5 dozen bottles. Druggists and harness shops or manufacturers sell it. Agents wanted.

SPOHN MEDICAL CO., Chemists, Goshen, Ind.

COTS AND BOSTON CULTURE

Los Angeles Matron Had Trouble In Making Her Wants Known—Finally Secured a Small Bed.

"Apropos of Boston and her R's," said a Los Angeles matron, "I had a very funny experience with them both last year. We were living in a cramped flat in Boston, and I needed a small cot-bed for Harry, who was four years old. So I went to a furniture dealer's, where I was told that they didn't keep cots. The obliging clerk, however, directed me to a store on another street, where, he assured me, I would find plenty of cots.

"It turned out to be an ordinary toy shop, and though slightly taken aback, I walked right in.

"'Do you keep cots?' said I.

"'Yes'm.'

"'Well, I want one for a small boy of four.'

"The clerk came back in a moment, trundling a little red wagon after him!

"'When I want a cart,' I explained, as soon as I could catch my breath, 'I'll say so. What I really would like to get today, if the purchase is possible in this town of excessive culture, is a c-o-t, cot.'

"I was politely told that they kept cots, but not cots—and when I was directed to the store I had just left, where they kept cots, but not cots!

"I was confused, but determined, and I finally got a cot that had casters instead of wheels."

Weeks' Break-Up-a-Cold Tablets

A guaranteed remedy for Colds and La Grippe. Price 25c of your druggist. It's good. Take nothing else.—Adv.

Getting a Start.

"How do you want your eggs?"

"Soft boiled."

"Yessuh. I'll boil 'em about five minutes."

"Five minutes!"

"Yessuh. Dese is cold storage eggs an' it's liable to take 'em a couple o' minutes to thaw."

Extreme Popularity.

"You seem to stand well with your wife's relatives."

"I'll tell you something that will surprise you."

"All right."

"There's hardly one of them I couldn't strike for a loan with reasonable expectations of getting it."

His Objection.

"What's your objection to women voting?"

"They haven't got industry enough," said the man with short hair and a large diamond pin. "I used to see men who would willingly vote six or seven times in a day. I've never heard a woman talk who would think of voting more than once at the same election."

SOUR, ACID STOMACHS, GASES OR INDIGESTION

Each "Pape's Diapepsin" Digests 3000 Grains of Food, Ending All Stomach Misery in Five Minutes.

Time it! In five minutes all stomach distress will go. No indigestion, heartburn, sourness or belching of gas, acid, or eructations of undigested food, no dizziness, bloating, foul breath or headache.

Pape's Diapepsin is noted for its speed in regulating upset stomachs. It is the surest, quickest stomach remedy in the whole world and besides it is harmless. Put an end to stomach trouble forever by getting a large fifty-cent case of Pape's Diapepsin from any drug store. You realize in five minutes how needless it is to suffer from indigestion, dyspepsia or any stomach disorder. It's the quickest, surest and most harmless stomach doctor in the world.

Household Economy.

"You shouldn't permit the butcher to throw away all the trimmings after he has weighed your meat."

"I don't. I take them home and let the cook throw them away."

YOUR OWN DRUGGIST WILL TELL YOU Try Murine Eye Remedy for Red, Weak, Watery Eyes and Granulated Eyelids; No Smarting—just Eye Comfort. Write for Book of the Eye by mail Free. Murine Eye Remedy Co., Chicago.

The Accompaniment.

"Who told Billy that the champagne supply would not give out after all?"

"I don't know, but I guess it was a little hot bird."

BLACK LEG LOSSES SURELY PREVENTED by Cutter's Blackleg Pills. Low-priced, fresh, reliable; preferred by Western stockmen because they protect where other vaccines fail. Write for booklet and testimonials. 10-dose pkge. Blackleg Pills $1.00 50-dose pkge. Blackleg Pills 4.00 Use any injector, but Cutter's best. The superiority of Cutter products is due to over 15 years of specializing in vaccines and serums only. Insist on Cutter's. If unobtainable, order direct. THE CUTTER LABORATORY, Berkeley, California.

BACKBONE OF FARM PLAN.

The backbone of any successful farm plan is the system followed in crop production, says the Country Gentleman. About the first things the county agent looks into when he visits the farm are whether a well established rotation is consistently followed from year to year and whether this rotation is adapted to the type of soil, the climate and the uses to which the crops are put. Nearly every important improvement in the farm plan must follow the line of the rotation. The use of fertilizers must conform to it, and the silo, the storage facilities and the animals kept to consume the forage are all influenced by it.

CAMPAIGN AGAINST INSECTS.

New Annual Report of Government Entomologist Shows Progress.

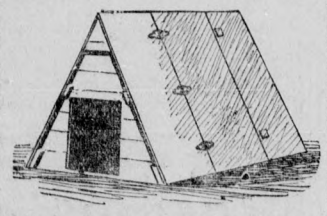
The control of such dangerous insects as the gypsy moth, cotton boll weevil, alfalfa weevil, green bug and potato tuber moth has kept the office of the United States department of agriculture's entomologist busy during the past year, according to the new annual report. Besides directing its attention to combating insects that attack crops, the office has been active in attempting to eradicate insects that affect the health of man and animals, such as malaria bearing mosquitoes, the spotted fever tick and the typhoid fly. Special attention has been given to insects injuring forests and those affecting stored products, such as grain, flour, prepared cereals, meat and cheese. Work in bee culture has also progressed satisfactorily.

The gypsy moth campaign, waged also against its cousin, the brown tail moth, has been very encouraging, there being a marked decrease this year in the numbers of both these pests. Parasites and beetles that attack these dangerous insects have been introduced and have been largely instrumental in bringing about good results. Colored posters were prepared by the office illustrating the gypsy moth and its natural enemies, and these were posted in all postoffices and town offices in the infected districts, and copies were sent to granges and public libraries. The campaign has also been waged by mail and boy scouts, who have distributed cards bearing the same illustrations.

A combination spray composed of lime sulphur, arsenate of lead and nicotine has been used successfully during the year by many orchard growers to control insects and fungous diseases. Other poisons to control orchard insects have been developed and are now being tested. Arsenical sprays are being made more practicable for use in combating cranberry pests in New Jersey. Effective spraying has also been done in the pecan orchards of the south, interested growers aiding the department in the work. Remedies are also being recommended and developed for pests that endanger apple, peach and pear orchards.

Economical Hog House.

The A type of hog house for farrowing sows is popular with many hog raisers. The house shown reproduced from Country Gentleman can be built to good advantage at small cost. The building shown is called the Economy house. It has floor dimensions of 5 by



7 feet. This house, built to use an earth floor, costs $9.07, figured on the same basis as the regular Iowa or A house. From the standpoint of economy, this house at less than $10 is the most convenient and handy movable or portable type.

WINTERING BEES OUTSIDE.

It is a common practice in New England to winter bees on their summer stands, and this is a perfectly safe plan if suitable protection be given. Probably the simplest and most successful method is to keep the bees in ten frame hives and to replace the end frame on each side with a chaff division board. This confines the cluster to eight frames and keeps it away from the cold walls.

In any case the top of the hive should have careful attention, for that is where the greatest danger lies. The best plan is to tack a piece of burlap on the bottom of a super or a winter case and set it over the hive without any board under it. Then the super should be filled with shavings or chaff. This arrangement allows for the gradual escape of moisture from the hive and gives greater satisfaction than the use of a board over the hive. An ordinary hive cover may be used, but the new metal roof double cover is much to be preferred.

When this general plan is adopted it is a simple matter to feed the bees even in winter by using the sugar cakes now on the market. These cakes come in pie tins, which are inverted over the frames, and may be slipped in place at any time by simply raising the super a little.—American Agriculturist.

Local and Personal

The Henry Campbell family left yesterday for weeks vacation at Capitola.

Miss Muriel Palmer went up to Palo Alto Wednesday for a two day's visit with the Misses Beaver.

E. R. Kennedy left Wednesday for Yuba County on a several day's business trip in the interests of the Campbell Realty Co.

The annual banquet of the Campbell Improvement Club occurs tonight at the Coffee Club. Tickets are 50c a plate. Take part in this get-together meeting.

The play, "Beverly's House Party" which was to have taken place in the High School hall Saturday evening has been postponed, the date to be reset after the opening of school.

S. G. Rodeck brot a cherry branch to our office Wednesday in blossom, and the leaf buds of which were opening out. It was picked from a tree in his yard on Campbell Ave.

J. C. Lloyd received the sad news of the death of his father, the Hon. A. G. Lloyd of Waitsburg, Wash., Tuesday, and left Wednesday for that place to attend the funeral.

Mrs. W. T. Alexander, who went to San Francisco to spend Christmas with her son, has been quite ill with pleurisy. She is able to sit up but will be unable to return for two or three weeks. Mr. Alexander was there also for several days.

Neither the Campbell Grammar nor High Schools were reopened Monday on account of the prevalence of measles and a few cases of more virulent diseases. The county health officer ordered them closed for at least a week and maybe longer.

C. E. De Selle has sold his residence on Dillon avenue to Henry Brown and has purchased a lot on North Second Street where he is already at work on his new home. For the present the family has moved into the Chas. Townsend house on First Street.

"But, my dear fellow, how on earth do you arrive at the conclusion that I've been at King's? "Watson" replied the great detective, as he reached for the inevitable pouch of "shagg" your simplicity at times is really amusing. Why, the pleased expression on your face tells me you could have come from no where else."

Mrs. Mary Cauffman passed away at the home of her daughter, Mrs. E. I. Price on Dry Creek, New Year's day. Mrs. Cauffman was almost 93 years old, and has made her home with her daughter here for a number of years. The erection of a library building in Campbell was a matter of great interest to this aged lady, and she was largely instrumental in starting the fund for the purchase of the present library site and the building of an up-to-date structure.

Annual Meeting and Supper

For the first time the Congregational Church held their Annual meeting in January—instead of April as heretofore, thus making the church year coincide with Calendar year. In spite of the rain and measles more were present than last April, when the orchard work was on. The long tables were all filled at the supper hour where the usual sumptuous spread was enjoyed.

At the business meeting following the Pastor acted as Moderator. The reports all showed a most satisfactory and encouragtng condition in all departments of the work. One delightful thing being that practically all departments reported a balance on the right side of the ledger.

The following constitute the Official Board and Officers for the coming year: Trustees:—A. B. Townsend; Wm. Cutting; E. C. Merrill; and J. F. Duncan. Deacons:—C. N. Cooper; Geo. Parso; H. V. Archibald; S. G. Nelson. Church Clerk, Mrs. L. F. Shaw. Treasurer, F. H. Cutting. Sunday-School Superintendent, Mrs. W. W. Stewart. Music Committee, Marshall Ross; J. F. Duncan; Mrs. A. B. Townsend. Ushers, Roy G. Archibald; Stanley Smith; Geo. H. Schuyler.

A committee consisting of W. H. Stray Mrs. L. F. Shaw, A. B. Townsend, C. N. Cooper and E. C. Merrill was selected to draft a proposed constitution and by-laws, to be submitted at a called meeting of the church later on.

Arrangements are under way with the athletic department of the San Jose Y. M. C. A. for an instructor to come out one night a week and direct the boys in the basement gymnasium of the church.

Congregational Church

"The Friendly Church just around the Corner."

The theme for Sunday morning is: "The Achievements of the Faith Men of History." Talk to the boys and girls on "A Heroine who made a hero."

Sunday-School and Endeavor as usual with a hearty welcome to all.

Stereopticon—Service in the evening, 70 beautiful slides on "Life and Work in European Turkey before the War." Come if you have no other place to go and bring your friends.

GEO. E. ATKINSON, Pastor.

Masons Install

The annual installation of Charity Lodge F. & A. M. will be held at the I. O.O.F. hall Monday evening at which time the following officers will be installed for the ensuing year:

Irving W. Snow, Worshipful Master;
Walter I. Merrill, Senior Warden;
Charles DeSelle, Junior Warden;
John C. Ainsley, Treasurer;
James Fablinger, Secretary;
Roy G. Archibald, Senior Deacon:
Thomas Mendel, Junior Deacon;
S. A. Moulton, Chaplain;
Chauncey H. Whitman, Marshall;
Harry C. Smith, Senior Steward;
Ralston Alison, Junior Steward;
Charles Townsend, Tyler.

C. H. Whitman will act as installing officer. Refreshments will be served in the banquet room following business.

Wont Haul Booze

The Southern Pacific has reminded wine and liquor shippers in general, that, owing to the new prohibition law in Arizona, which becomes effective January 1st, it will be necessary for the railroads serving that state to decline to accept for transportation to Arizona points any shipments of intoxicants after January 1. Likewise it will not be possible to accept such shipments which cannot be delivered at destination on or prior to December 31, 1914.

The law was adopted by popular vote in Arizona, and the railroads as common carriers, are charged with the same responsibility as individuals for the observance of it. Agents, conductors and others have been notified to bear this actively in mind.

Interested shippers have been urged to forward any shipments of this nature intended for Arizona points without delay, as the carriers must be sure they can get the shipment into the state by December 31st, or refuse to accept them.

The instructions do not apply to shipments of liquor between points in Arizona over a route entirely within the state, nor to shipments from Arizona to points outside the state.

God's goodness gave me my 90th Christmas and New Year's days, both pleasant and enjoyable ones. 1914 was a good year to me. I had added to my grand- and great grand-children, now numbering more than half a hundred, four grand-daughters, three Browns and one Thompson. Following is a Christmas greeting from one of the Browns, at Buckley, Michigan.

Grandpa Brown

TO GRANDFATHER

The mists of years are gathered 'ronnd thy path,
Their hoar-frost on thy head,
And where were vaunting dreams and and busy deeds,
Are memories, instead.

Thy face is toward the purple horizon,
Where sinks the sun,
And the long race wherein we all must strive,
Is almost run.

And yet with that serenity of soul
You tread the westward way,
As one who knows that just beyond the dark,
Lieth the day.

As one whose treasured gift to them has been,
A life of bameless days,
Upon the day when came the Gitt of Gifts,
Thy children give thee praise.

Thy children give thee honor as again
Comes the glad Christmas-tide,
Praying that all its joys and all its peace
May with thee bide.

Methodist Church Notes

Methodist Men's Muster January 26.

The first date for the League course of entertainments, Feb. 2nd.

The pastor preached at the Centella church, San Jose, Monday evening.

How many of our members read the report from the Campbell church in last week's California Christian Advocate?

Our Epworthians made 33 pairs of slumber slippers for the women in the county hospital and a committee of four presented them New Year's Day.

Thanks to the Ladies' Aid, we have thirty more copies of the hymnal. Now let everyone sing,- or try to.

Sunday morning the sermon topic will be "A Common Sin", and the eveniug subject, "Three Great Enemies of Christianity".

Much interest is being manifested in the cottage meetings which we have been holding this week in recognition of the week of prayer.

Notice of Annual Meeting of the Stockholders of Santa Clara Valley Water Company

The regular annual meeting of the stockholders of the Santa Clara Valley Water Company will be held at the office of said corporation, at the Northeast corner of Campbell Avenue and Central Avenue in the town of Campbell, County of Santa Clara, State of California, on the 11th day of January, 1915, at ten o'clock A. M., for the purpose of electing a Board of Directors to serve for the ensuing year and for the transaction of such other business as may properly come before said meeting.

Dated December 24th, 1914.
E. R. KENNEDY,
Secretary.

Santa Clara Valley Water Company

Notice of Meeting of Stockholders to Consider Creating and Increasing Bonded Indebtedness

Notice is hereby given that in pursuance of a resolution and order of the Board of Directors of the Santa Clara Valley Water Company, which was unanimously adopted at a regularly called meeting of said Board of Directors, duly held at the principal place of business and office of the Company at the Northeast corner of Campbell Avenue and Central Avenue in the town of Campbell, in the County of Santa Clara, State of California, on Tuesday, the 22nd day of December, 1914, at four o'clock P. M., a special general meeting of the stockholders of the Santa Clara Valley Water Company will be held on Wednesday, the 24th day of February, 1915, at the hour of two o'clock P. M. at the office of E. R. Kennedy, its Secretary, at the Northeast corner of Campbell Avenue and Central Avenue, in the town of Campbell, in Santa Clara County, California, (that being the principal place of business and the office of said Company and the building where the Board of Directors usually meet), for the purpose of considering and acting upon a proposition to create a bonded indebtedness of said Company to the amount of Fifteen thousand dollars ($15,000) in Gold Coin of the United States of America, and thereby to increase its bonded indebtedness from Eight thousand dollars ($8000) to Fifteen thousand dollars ($15,000), in Gold Coin of the United States of America, and to secure the same by a mortgage or deed of trust upon all the real and personal property of the Company to be described in said mortgage or deed of trust and to provide the terms and conditions thereof as authorized and directed by the Railroad Commission of the State of California, and to do every thing else in relation thereto to the end and for the purpose of providing means and raising money, (1) for retiring and refunding its present bonded indebtedness of Eight thousand dollars ($8000), and (2) for discharging its floating indebtedness of one thousand four hundred and fifty-five dollars ($1455), and (3) for making immediate improvements and betterments for the maintenance of service to the amount of Five hundred and forty-five dollars ($545), and (4) for raising and providing Five thousand dollars ($5000) for the purchase of property, maintenance or improvement of service, or construction, completion, extension or improvement of facilities of the Water Company, as hereafter may become necessary and as directed and authorized by the Railroad Commission of the State of California, all within its corporate powers and within the purposes and objects of the corporation.

Dated this 24th day of December, 1914.
By the order of the Board of Directors.
E. R. KENNEDY,
Secretary of the Santa Clara Valley Water Company.

Sold by all Druggists, 75c.
Take Hall's Family Pills for constipation.

It Isn't Your Town--It's You!

If you want to live in the kind of a town
Like the kind of a town you like,
You needn't slip your clothes in a grip
And start on a long, long hike.
You'll only find what you left behind,
For there's nothing that's really new.
It's a knock at yourself when you knock your town.
It isn't your town—it's you.

Real towns are not made by men afraid
Lest somebody else gets ahead.
When everyone works and nobody shirks,
You can raise a town from the dead.
And if, while you make your personal stake,
Your neighbor can make one, too,
Your town will be what you want to see,
It isn't your town—it's YOU!

—Anonymous.

Sunnyside Notes

Miss Florence Harris and her twin brother came up from their home at Winton, Merced County, New Year's day and visited the family of Walter Huntley. Miss Harris was on her way to Watsonville where she is teaching school and Mr. Harris is enrolled as a student at the San Jose Business College.

Little Frederick Cowles is quite sick with the measles.

Mr. A. Trevor has gone to Richmond to look after his property interests there.

Mrs. J. M. Kingdon was called home to Quincy, Plumas County by the serious illness of her mother a week ago.

Mr. and Mrs. P. Arnott returned from their vacation in Los Angeles Monday night. They report an enjoyable time and pleasant weather during their sojourn which greatly benefitted Mrs. Arnott's health.

Mrs. John Bibb has been removed to the Columbia Hospital and is reported much better.

Among the many improvements scheduled for the New Year is one looking to the convenience of people who wish to reach Sunnyside without taking a roundabout way. Geo. E. Hyde & Son have been interviewing the property holders as to the feasibility of opening a street directly through the holdings now occupied by their drying grounds. Sunnyside already has two good direct outlets and will have a third as soon as the fences obstructing the lower end of the alley are removed but could do with another and it is hoped that Mr. Hyde will carry out his liberal minded plans without delay.

Auto For Sale

A 1914 model Overland automobile in first class condition. For particulars call at the CAMPBELL PRESS OFFICE
